

A program focused on helping you improve your health

Introducing digital diabetes prevention coaching

More than 98 million Americans are living with prediabetes, but roughly 8 out of 10 aren't even aware they have it.¹ Prediabetes often doesn't cause symptoms, but it does increase the risk of developing type 2 diabetes, heart disease, and stroke. That's why Anthem has partnered with Lark to offer a diabetes prevention program that can help determine if you're at risk for prediabetes and, if you need to, take steps to address it.

This program can help you:

				
Lose weight	Eat healthier	Increase activity	Sleep better	Manage stress

Better health is within reach

Participation in this program is at no extra cost as part of your health plan. Track progress, check in with a personalized coach, and learn more about prediabetes in Lark's free mobile app. This program is flexible and convenient, and follows guidelines from the Centers for Disease Control and Prevention (CDC) to help make small changes that can improve health and decrease risk over time.

Kentucky Employees' Health Plan

Weight loss with Lark

Losing weight can make a difference in lowering risk for type 2 diabetes. Lark members lose an average of 4.2% of their body weight in 12 months on the diabetes prevention program.² Participants in the program receive a wireless scale at no extra cost to help track weight loss progress. The scale also syncs with the Lark app so participants can share updates with their coach.

24/7 coaching support

Losing weight and making lifestyle changes can feel intimidating even if it can lead to better health. Coaches can help you stay motivated. If you enroll in the program, you can send a message to a coach anytime from anywhere and receive an immediate response, as well as extra support. During the course of the program, coaches will:

- Provide educational information on prediabetes and preventing type 2 diabetes.
- Be available 24/7 through the Lark mobile app to provide personalized coaching.
- Customize a program based on your food preferences and lifestyle.
- Provide information about how stress affects your health and how to cope with it.

You are in control of your health. Prevent diabetes and start improving your overall health and well-being today.

Learn if you are at risk for prediabetes

Scan the QR code with your phone's camera or go to lark.com/anthem and take the one-minute quiz to see if you could benefit from Lark's diabetes prevention program.
