RE: Termination of CVS/Caremark Weight Management Program

DATE: November 5, 2025

Effective January 1, 2026, the weight management program participation requirement to receive anti-obesity medications (AOM) will no longer be in effect. The CVS Weight Management program will end December 31, 2025.

While the weight management program is ending, a prior authorization for the medication by a healthcare provider will still be required.

Members currently participating in the weight management program to meet the 2025 requirement should continue participation through the end of the year.

What does this mean for members?

- CVS will send a letter to all active enrollees on or about December 1, 2025.
- No member who obtains an AOM prescription after December 1, 2025, will be required to enroll in the weight management program.
- Existing enrollees will continue to have access to their records through the weight coach app through December 31, 2025.

If members have questions about their current prior authorization for AOM, they should contact CVS/Caremark at 866-601-6934.
